

Transparent Film Heater Specification

Transparent Heaters Transparent Heating Film Transparent Film Heaters Transparent Heating Membrane Transparent Membrane Heaters, Transparent ITO heaters, ITO transparent heating film , Transparent ITO film heaters,Transparent ITO heating membrane,Transparent CCTV Film Heaters,Transparent Helmet Film Heaters.

Specification:

1. Material: Transparent PET film or Transparent tempered glass
2. Maximum dimension: 406*356MM
3. The thickness of transparent PET film: 0.1mm, 0.125mm, 0.15mm,0.175mm various as per the electrical resistance of the heating element.
The thickness of transparent tempered glass: 0.55mm, 0.75mm, 1mm,8~5mm (custom is optional)
4. Haze: <2%, Adhesion: 100/100, roll-up: <=10mm
5. The evenness of the surface resistance:<7%
6. Thermal contraction: MD≤1.3, TD≤1.0
7. Thermal stability:
High temperature: 80C,120hr ≤1.3
Low temperature: -40C,120hr ≤1.3
Heat circulation: -30C—80C ≤1.3
Heat/Humidity: 60C 90% RH,120hr ≤1.3
9. Temperature range: 0~120C
10. Voltage: 0~380V, Vac and Vdc are optional
11. Square resistance: 6~150ohm
12. Dielectricity: 2000Vac/1 minute
13. Insulation: >100M ohm
14. Leakage current:<0.25mA at humidity of 0~80%
15. Life span: >10000 hours
16. Transmissivity: 85%,
17. Shape: Any shape is possible
18. Application:
A: On Helmet for construction, motorcycle, Outdoor CCTV, Camera for anti-fog
B: On outdoor LCD display,LED display,outdoor glass
C: On outdoor meter,portable computer,DVD,optical len,glasses, LCD panel,anti-fog windowetc.
19. Custom is welcome here with your drawing or request,please call for any inquiry or question: 86-15360134400 or skype: firefly197915
